

IMPLEMENTING WEB APPLICATION

Date	30 Oct 2022
Team ID	PNT2022TMID34869
Project Name	PLASMA DONOR APPLICATION

CREATING UI TO INTERACT WITH APPLICATION:

The screenshot displays a web browser window with a single tab titled 'HOME'. The address bar shows the URL '127.0.0.1:5000'. Below the browser window, the 'HOSPITAL HOME PAGE' is visible. The page features the heading 'Hospital Chatbot is embedded to provide answers to quer' (partially cut off). Below this heading, there are two instructions: 'Click the icon in bottom right corner to open chatbot' and 'Type 'Hi' to begin the conversation'. To the right of the text, a mobile app interface for 'Watson Assistant' is shown. The app interface includes a home icon, a title bar, and a chat window. The chat window shows a conversation where the user has typed 'hi', and the chatbot has responded with 'Hello, this is your hospital chatbot how may I help you?' and 'Have you been to this hospital before?'. Below the chatbot's response are 'Yes' and 'No' buttons. The 'Yes' button is selected. Below the buttons is a text input field with the placeholder 'Enter your OP number'. At the bottom of the app interface is a blue circular icon with a white question mark, which is the chatbot icon mentioned in the text. The bottom of the screenshot shows a Windows taskbar with the date '01-11-2022' and time '01:19'.

HOSPITAL HOME PAGE

Hospital Chatbot is embedded to provide answers to quer

Click the icon in bottom right corner to open chatbot

Type 'Hi' to begin the conversation

Watson Assistant

hi

Hello, this is your hospital chatbot how may I help you?

Have you been to this hospital before?

Yes No

Yes

Enter your OP number
